or Zoom** (*Zoom link will be in registration confirmation email*)

## **Ambulatory Neurology Nurse Education Series: Hospital-at-Home: From Concept to Reality Across the MGB System: Part 1: Hospital-at-Home Explained: What It Is, How It Works, and Its Growth**

*A collaborative initiative between the MGHSON NAA, the MGH Institute of Health Professions, and the Department of Nursing MGN*

*This educational series provides opportunities for the ambulatory neuro nurse to learn best practices and remain informed of the ever-changing advancements in the care of ambulatory patients with neurological diagnoses. Part 1 of this series will discuss what a hospital-at-home is, the reasons for its inception, the patient admission process, and eligibility criteria.*

### **Featured Faculty:**

**Heather O'Sullivan, MS, APRN**

At the end of this activity, the learner will be able to:

- Define what the hospital-to-home program is and discuss its value to the patients and the organization.

The intended audience for this educational offering: RNs, NPs

Course directors: Andrea Thurler, DNP, RNP-BC, Abigail Shaughnessy, MSN, RN-NC, Rose Gallagher, RN, and Owen O'Connor, RN
